5. **Our Company has availed unsecured loan from parties other than bankers & financial institutions which is repayable on demand. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.**

Our Company has availed certain unsecured loan and are repayable on demand. Though our Company intends to repay the loan amount in near future, sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section “Unsecured Loans” under “*Financial Information*” beginning on page **Error! Bookmark not defined.** of this letter of offer. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

Further, we have provided loans to our related parties to fulfil their business objectives, and we have provided guarantees to banks on behalf of our related parties to meet their funding requirements. We have not been provided any collateral in relation to loans provided by us to our related parties. As of August 29, 2023, we expect all outstanding loans and guarantees provided to our related parties and guarantees provided to banks on behalf of our related parties to be recoverable. However, we cannot assure you that there will not be any material impairment in the recoverability of the loans provided to our related parties or guarantees provided on behalf of our related parties in the future.

6. **The objects of the Issue include funding working capital requirements of our Company, which is based on certain assumptions and estimates.**

The objects of the Offer include funding working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “**Objects of the Issue**” on page 50 of this Letter of Offer. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions.

Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

7. Our failure to perform in accordance with demand of our client could result in loss of business or payment of liquidated damages.

Our failure to perform in accordance with demand of our client, which may increase our compliance costs. In the event we are unable to effectively fulfil our obligations or address the quality requirement set by our clients and as a result of which our clients may experience service shortfalls. We may also be required to pay compensation or liquidated damages to our clients.

Any disruptions to our businesses, including as a result of actions outside of our control, could significantly impact our ability to meet the quality or performance standards which may in-turn harm our reputation. Such quality lapses could strain our relationship with our clients and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our clients may lose faith in the quality of our services and could in turn refuse to further deal with us, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and service liability claims being brought against us by our customers for defective services provided. We may need to allocate additional resources and funds from our revenue towards litigation costs, which could materially impact our business operations. We cannot assure you that we will not experience any material liability losses in the future or that we will not incur significant costs to defend any such claims. Liability claim may adversely affect our reputation and brand image, as well as entail significant costs thereby impacting our business, results of operations and financial condition.

8. We are dependent on our senior management team and the loss of key members or failure to attract skilled personnel may adversely affect our business. We believe we have a team of professionals to oversee the operations and growth of our business.

Our performance is substantially dependent on the expertise and services of our senior management and other key personnel. We believe that the inputs and experience of our senior management and key managerial personnel are valuable for the development of business and operations and the strategic directions taken by the Company. We cannot assure that we will be able to retain any or all of the key members of our management team or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with the Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such key members of our management team could have an adverse effect on our business and our results of operations. The continued operations and growth of our business is dependent upon our ability to attract and retain personnel who have the necessary and required experience and expertise. Competition for qualified personnel with relevant industry expertise in India is intense. A loss of the services of our key personnel may adversely affect our business, results of operation and financial condition. For further details of our senior management team, please see the section titled '*Our Management*' on Page 98.

9. Our Company had entered into various transactions with our Promoters, Promoter Group, Directors and their Relatives and Group Companies. Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may adversely affect our competitive edge and better bargaining power had these transactions have been entered with non-related parties resulting into relatively more favorable terms and conditions and better margins.

Our Company, had entered into various transactions with our Promoters, Promoter Group, Directors and their Relatives and Group Companies. These transactions, inter-alia includes sale/purchase of goods, payment for services received/rendered, remuneration, etc. Our Company entered into such transactions due to easy proximity and quick execution. However, there is no assurance that we could not have obtained better and more favorable terms had our Company not entered into such related party transactions. Our Company may enter into such transactions in future also and we cannot assure that in such that event there would be no

adverse effect on results of our operations. For details please refer *Related Party Transactions* of the Auditor's Report under Section titled —*Financial Information of the Company* beginning on page 113 of this Letter of Offer.

10. Our Company has not entered into any long-term contracts with its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.

Our Company has had long standing business relationships with various customers and have been supplying our products to several customers including repeat orders received from them. However, we have not entered into any fixed contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, quality consistency, fluctuation in demand for our Company's products and customer's inventory management.

Although we place a strong emphasis on personal interaction by the top management with the customers, in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

11. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse effect on our operations, profitability and growth prospects.

We operate in a capital intensified industry therefore our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favorable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

12. The land parcels on which the Registered Office of our Company is located, is being shared between our Company and its Subsidiaries. As of the date of this letter of offer, the registered office of our Company and our Subsidiaries is held on a leasehold basis on same the premises of 201, Navkar Plaza, Bajaj Road, Vile Parle (West) Mumbai 400056, Maharashtra, India, the details of which are specified as below:-

13. We have not entered into any long term supply agreement for the major raw materials required for manufacturing of our products. Also volatility in the prices and non-availability of these raw materials may have an adverse impact in our business.

We depend highly on galvalume steel, galvanized steel, cold-rolled coils, aluminum-zinc alloy-coated steel sheets, and galvanized steel, which are the prime raw materials for our products. We generally procure these

raw materials from indigenous and international suppliers as and when required. Any fluctuation in the international prices of these metals affects the price and supply of these raw materials. Therefore, any significant increase in the prices of these raw materials due to any reason, and our inability to pass on increased costs of raw material to our customers or reduction in demand from our customers, may adversely affect our sales and profitability. In the absence of any long-term arrangement with suppliers and event of any disruption in the supply of raw materials supply in terms of requisite quantities and qualities, our production schedule may also be adversely affected.

14. Our business is exposed to the changes in the technical and other requirements of our clients, which may require us to make major capital investments or may be beyond our capabilities.

Our business is exposed to changes in the technical and other requirements of our clients. Better and newer technologies being developed worldwide help optimize performance, reduce operational costs. Further, our customers may choose to include specific conditions with respect to age and condition of the machinery in the contracts we enter into which may require us to make further investments to meet such requirements.

15. The pricing in the steel industry is subject to market demand, volatility and economic conditions.

Fluctuations in steel prices may have a material adverse impact on our business, results of operations, prospects and financial conditions. Steel prices fluctuate based on a number of factors, such as, the availability and cost of raw material inputs, fluctuations in domestic and international demand and supply of steel and steel products, international production and capacity, fluctuation in the volume of steel imports, transportation costs, protective trade measures and various social and political factors, in the economies in which the steel producers sell their products and are sensitive to the trends of particular industries, such as, the construction and machinery industries. When downturns occur in these economies or sectors, it may lead to a decrease in steel and steel product prices. Low steel prices adversely affect the businesses and results of operations of steel product producers generally, including ours, resulting in lower revenue and margins and write-downs of products and raw material inventories. Further, substantial decreases in steel and steel product prices during periods of economic weakness have not always been balanced by commensurate price increases during periods of economic strength. Any sustained price recovery shall require a broad economic recovery, in order to underpin an increase in real demand for steel and steel products by end users. In addition, the volatility, length and nature of business cycles affecting the steel and steel products industry may become increasingly unpredictable, and the recurrence of another major downturn in the industry may have a material adverse impact on our business, results of operations, financial condition and prospects.

16. The deployment of the Net Proceeds from the Issue is based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Issue.

Our Company intends to primarily use the Net Proceeds from the Issue towards working capital as described in '*Objects of the Issue*' on page 50. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹ 50 crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section '*Risk Factors*', may limit or delay our Company's efforts to use the Net Proceeds from the Issue to achieve profitable growth in its business.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in Chapter VI-A of the SEBI ICDR Regulations pursuant to the SEBI ICDR (Second Amendment) Regulations, 2016 dated February 17, 2016. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from

agreeing to the variation of the proposed utilization of our Net Proceeds, even if such variation is in our interest.

Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI. Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer. If we are unable to obtain the necessary funds for our growth plans, our business and results of operations may be adversely affected.

There can be no assurance that debt or equity financing or our internal accruals shall be available or sufficient to fund our growth plans. Financing limitations may restrict our ability to obtain required capital on acceptable terms in addition to other uncertainty. Due to our inability to raise sufficient capital to finance our growth plans, the business of our Company and results of operations may be adversely affected.

17. The price of the Equity Shares may be highly volatile after the Issue.

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors including volatility in the Indian and global securities market, our operations and performance, performance of our competitors and perception in the market about investments in the our industry, adverse media reports on us or the industry, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India's economic liberalization and deregulation policies and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

18. Restrictions on import of raw materials may impact our business and results of operations

We currently import some portion of our raw materials. Raw material imports are regulated by certain specific laws and regulations that permit concerned authorities to stop any import if it is deemed that the goods proposed to be imported may be hazardous. While the raw materials we import may not be hazardous in nature, we cannot assure you that such regulations will not be made applicable to us or that such regulations will not evolve into more stringent regulations, which would place onerous requirements on us and consequently restrict our ability to import raw materials. While we have not in the recent past experienced any challenges in importing such materials, we cannot assure you that we will not experience any such challenges in the future. In light of the COVID-19 pandemic and the current war scenario in Eastern Europe, the import of raw materials could be affected in the future. In the event we are unable to import these materials, there can be no assurance that we will be successful in identifying alternate suppliers for raw materials or we will be able to source the raw materials at favourable terms in a timely manner or at all. Any change in law or applicable governmental policies relating to imports, change in international geo-political situations, restrictions on import of raw materials could have an adverse effect on our ability to deliver products to our distributors, business and results of operations.

19. As the Equity Shares of our Company are listed on the BSE, our Company is subject to certain obligations and reporting requirements under the SEBI (LODR) Regulations and comply with other SEBI Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.

The Equity Shares of our Company are listed on BSE, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI (LODR) Regulations, to the extent applicable, and have to adhere to and comply with other applicable Regulations framed by SEBI. Our Company endeavors to comply with all such obligations and reporting requirements, any non-compliance which might have been committed by us, may result into Stock Exchange and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act and the rules and regulations made there under

and applicable SEBI Circulars. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

20. We require to obtain, maintain and/or renew certain registrations, approvals, licenses and permission in ordinary course of our business, and failure to do so, in a timely manner or at all, we may be unable to fully or partially operate our businesses and our results of operations may be adversely affected.

We require certain approvals, licenses, registrations and permissions for our operations. For further details, please refer to section titled '*Government and Other Approvals*' beginning on page 161. While, we believe we will be able to obtain, maintain and renew such approvals or permits as required, there can be no assurance that we can do so in the timeframes anticipated by us, or at all. If we fail to obtain, maintain or renew any of these approvals or permits in a timely manner or at all, our operations and expansion plans may be interrupted, which could adversely affect our growth strategy, business and results of operations. Furthermore, our approvals and permits are subject to numerous conditions, some of which are onerous and require us to make substantial expenditures. If we fail to comply or a regulator alleges that we have not complied with these conditions, our business and results of operations could be adversely affected.

21. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

22. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition.

We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations. While we ensure that our products are put through the best quality control checks, they might have certain quality issues or undetected errors, due to defects in manufacture of parts which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of our internal quality standards and policies. However, we cannot assure you that our quality control processes will not fail, or the quality tests and inspections conducted by us will be accurate at all times. Any shortcoming in the raw materials used in the products or any shortcoming in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may result in deficient products. In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we may be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses may strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which may have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

23. Accidents at our facilities may lead to public liability consequences.

Though we take all possible steps to ensure adoption and compliance with high standards of safety and fire control at our facilities, we cannot assure you that these mechanisms will be adequate to contain safety risks that may arise in the future. Though we maintain public liability insurance cover for our facilities, in the event of an accident, we may be exposed to civil, tort and criminal liabilities.

Operating and managing a business involves many risks that may adversely affect our Company's operations, and the availability of insurance is therefore important to our operations. Our Company believes that our insurance coverage is generally consistent with industry practice. However, to the extent that any uninsured risks materialize or if it fails to effectively cover it for any risks, we could be exposed to substantial costs and losses that would adversely affect financial condition. In addition, our Company cannot be certain that the coverage will be available in sufficient amounts to cover one or more large claims, or that our insurers will not disclaim coverage as to any claims. A successful assertion of one or more large claims against our Company that exceeds our available insurance coverage or that leads to adverse changes in our insurance policies, including premium increases or the imposition of a large deductible or coinsurance requirement, could adversely affect our financial condition and results of operations.

24. We are required to comply with environmental laws and regulations that could cause us to incur significant costs.

Our operations are subject to various international, national, state and local laws and regulations, which are subject to laws specific to the industry in which we operate, as well as laws generally governing business in India, including those relating to the protection of the environment and occupational health and safety, including those governing the generation, handling, storage, use, management, transportation and disposal of, or exposure to, environmental pollutants or hazardous materials resulting from our business operations. While we are not aware of any outstanding material claims or obligations, we may incur substantial costs, including clean up or remediation costs, fines and civil or criminal sanctions, and third-party property damage or personal injury claims, as a result of violations of or liabilities under environmental or health and safety laws or non-compliance with permits required at our facilities, which, as a result, may have an adverse effect on our business and financial condition.

25. Our business is substantially affected by prevailing economic conditions in India.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal Stock Exchanges;
- changes in India's tax, trade, fiscal or monetary policies; • political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions, including in India's principal export markets; and
- other significant regulatory or economic developments in or affecting India or its forging industry.
- any adverse fluctuations in currency points. Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business and financial performance and the price of the Equity Shares.

26. We have not commissioned an industry report for the disclosures made in the section titled '*Industry Overview*' and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.

We have neither commissioned an industry report, nor sought consent from the quoted website source for the

disclosures which need to be made in the section titled '*Industry Overview*' beginning on page 61. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Letter of Offer. Further, the industry data mentioned in this Letter of Offer sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

27. We operate in a highly competitive and fragmented industry with low barriers to entry and may be unable to compete successfully against existing or new competitors, the organized and unorganized

We operate in an industry which is highly competitive and fragmented and we compete with a range of organized and unorganized players, both at the national and regional level. Further, while we have an expanding portfolio of products, our competitors may have the advantage of focusing on concentrated products. Further, we compete against established players also, which may have greater access to financial, technical and marketing resources and expertise available to them than us in the products and services in which we compete against them.

Further, industry consolidation may affect competition by creating larger, more homogeneous and potentially stronger competitors in the markets in which we compete. Our competitors may further affect our business by entering into exclusive arrangements with our existing or potential clients. There can be no assurance that we will be able to compete successfully against such competitors or that we will not lose our key core employees, associates or clients to such competitors. Additionally, we believe that our ability to compete also depends in part on factors outside our control, such as the availability of skilled resources, pricing pressures in the staffing industry and the extent of our competitors' responsiveness to their client's needs. Our business may also be affected should our present or prospective clients choose to utilize their internal workforce or rely on independent contractors or local recruitment agencies in the organized segment for meeting their manpower requirements. Our continued success depends on our ability to compete effectively against our existing and future competitors. With the potential entry of new competitors, given the low entry barriers in the industry where we operate, our ability to retain our existing clients and to attract new clients is critical to our continued success. As a result, there can be no assurance that we will not encounter increased competition in the future nor can there be any assurance that we will, in light of competitive pressures, be able to effectively compete with our competition in the various product and service segments we operate in, whether on the basis of pricing, quality or range of services or otherwise, which could have a material adverse effect on our business, results of operations and financial condition.

28. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter '*Objects of the Issue*' on page 50. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

29. Fluctuations in the average selling prices of steel could adversely affect our business, financial condition, results of operations and cash flows.

The average selling prices of our products may be subject to fluctuations depending on the market conditions. The average selling prices of our products are affected by the general market conditions, such as pricing by competition and raw material costs, which could have an impact on the businesses of our customers and, in turn, their demand for our products. While, we have not experienced any material fluctuation in our average selling prices, we cannot assure you that we will not experience declining average selling prices for our products or that our average selling prices can remain at the same level in the future. A decline in the average

selling prices for our products could adversely affect our business and financial condition, operating results and cash flows.

30. The continuing impact of the COVID-19 pandemic on our business and operations is uncertain and it may be significant and continue to have an adverse effect on our business, operations and our future financial performance.

The World Health Organization declared the novel coronavirus disease (“COVID-19”) outbreak a Public Health Emergency of International Concern on January 30, 2020, and a pandemic on March 11, 2020. The rapid and diffused spread of COVID-19 and global health concerns relating to this pandemic have had a severe negative impact on, among other things, financial markets, liquidity, economic conditions and trade and could continue to do so or could worsen for an unknown period of time, that could in turn continue to have a material adverse impact on our business, cash flows, results of operations and financial condition, including liquidity and growth. Additionally, we cannot predict the impact that the COVID-19 pandemic will have on our customers, suppliers and other business partners, and each of their financial conditions; however, any material effect on any of these parties could in turn have an adverse impact on us. As a result of these uncertainties, the impact may vary significantly from that estimated by our management from time to time, and any action to contain or mitigate such impact, whether government- mandated or opted by us, may not have the anticipated effect or may fail to achieve its intended purpose altogether. Our existing insurance coverage may not provide protection or coverage for any costs that may arise from all such possible events. The COVID-19 pandemic may cause us to continue to experience the foregoing challenges in our business in the future and could have other effects on our business, including disrupting our ability to develop new offerings enhance existing offerings, market, and sell our products and conduct business activities generally. The extent to which the COVID-19 pandemic may impact our business and results of operations will also depend on future developments that are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the disease, the duration and spread of the outbreak, the scope of travel restrictions imposed in geographic areas in which we operate, mandatory or voluntary business closures, the impact on businesses and financial and capital markets and the extent and effectiveness of the development and distribution of vaccines and other actions taken throughout the world to contain the virus or treat its impact. An extended period of global supply chain and economic disruption as a result of the COVID-19 pandemic could have a material negative impact on our business, financial condition, and results of operations.

EXTERNAL RISK FACTORS

31. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

32. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

33. Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.

Our Company currently prepares its annual financial statements under Ind AS. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Ind AS under which our financial statements are currently prepared. Accordingly, the degree to which the Audited financial statements included in the letter of offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the letter of offer should accordingly be limited.

34. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition, and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability, and financial condition.

35. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic, or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition, and results of operations, in particular.

36. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Letter of Offer.

While facts and other statistics in the relating to India, the Indian economy, and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the section titled **"Industry Overview"** beginning on page 61 of this Letter of Offer. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

37. Global economic, political, and social conditions may harm our ability to do business, increase our costs

and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

38. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI, or any other government agency can be obtained on any particular terms or at all.

39. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

40. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

41. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition, and results of operations as well as the price of the Equity Shares.

42. Terrorist attacks, civil unrest and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition, and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such

as the terrorist attacks in India, other incidents such as those in US, and other countries and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade the global equity markets as well generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

43. Global economic, political, and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

ISSUE SPECIFIC RISKS

44. Any future issuance of Equity Shares may dilute your shareholdings and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future issuances of equity or convertible instruments by the Company may lead to the dilution of investors' shareholdings in the Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of the Company or the availability of these Equity Shares for futuresale will have on the market price of our Equity Shares.

45. Our Company will not distribute the Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.

Our Company will dispatch this Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the "Issue Materials") to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

46. SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021 and October 01, 2021 streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021, and October 01, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see '*Terms of the Issue*' on page 172.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form

only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

47. The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholders”) may lapse in case they fail to furnish the details of their demat account to the Registrar.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Rights Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

48. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Rights Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant’s decision to invest in the Rights Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants’ ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

49. Investors will not have the option of getting the allotment of Rights Equity Shares in physical form.

In accordance with the SEBI ICDR Regulations, the Rights Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Rights Equity Shares in physical form. The Rights Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see ‘*Terms of the Issue*’ on page 172. This may impact the ability of our shareholders to receive the Rights Equity Shares in the Issue.

50. Any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect

the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

51. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

52. There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

53. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, any company incorporated in India must offer its holders of equity shares preemptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

54. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign

currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

55. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

The demand and pricing in the steel industry is volatile and are sensitive to the cyclical nature of the industries it serves. A decrease in steel prices may have an adverse effect on our business, results of operations, prospects and financial condition.

Sales prices and volumes in the manganese and iron ore mining industry depend mainly on the prevailing and expected level of demand for manganese and iron ore in the steel industry. During periods of sluggish or declining regional or world economic growth, demand for steel products generally decreases, which usually leads to corresponding reductions in demand for manganese and iron ore. Historically, international prices for manganese and iron ore has been volatile and subject to wide fluctuations in response to relatively minor changes in supply and demand, market uncertainties, the overall performance of the global or regional economies, the related cyclical nature in the steel industry and various other factors beyond our control. The price of manganese and iron ore is directly affected by the steel industry, which is cyclical in nature. The prices of steel products are influenced by many factors, including demand, worldwide production capacity, capacity-utilization rates, raw-material costs, exchange rates, trade barriers and improvements in steel-making processes.

Any significant decrease in demand for steel products or decline in the price of these products could result in reduced manganese and iron ore demand and manganese and iron ore prices which could significantly reduce our revenues, thereby materially and adversely affecting our business, financial condition, results of operations and prospects.

Global Economic Overview

The global economy is experiencing a number of turbulent challenges. Inflation higher than seen in several decades, tightening financial conditions in most regions, Russia’s invasion of Ukraine, and the lingering COVID-19 pandemic all weigh heavily on the outlook. Global growth is projected to fall from an estimated 3.5 % in 2022 to 3.0 % in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in the April 2023 World Economic Outlook (WEO), it remains weak by historical standards. The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 % in 2022 to 6.8 % in 2023 and 5.2 % in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.

The recent resolution of the US debt ceiling standoff and, earlier this year, strong action by authorities to contain turbulence in US and Swiss banking reduced the immediate risks of financial sector turmoil. This moderated adverse risks to the outlook. However, the balance of risks to global growth remains tilted to the downside. Inflation could remain high and even rise if further shocks occur, including those from an intensification of the war in Ukraine and extreme weather-related events, triggering more restrictive monetary policy. Financial sector turbulence could resume as markets adjust to further policy tightening by central banks. China’s recovery could slow, in part as a result of unresolved real estate problems, with negative cross-border spillovers. Sovereign debt distress could spread to a wider group of economies. On the upside, inflation could fall faster than expected, reducing the need for tight monetary policy, and domestic demand could again prove more resilient.

In most economies, the priority remains achieving sustained disinflation while ensuring financial stability. Therefore, central banks should remain focused on restoring price stability and strengthen financial supervision and risk monitoring. Should market strains materialize, countries should provide liquidity promptly while mitigating the possibility of moral hazard. They should also build fiscal buffers, with the composition of fiscal adjustment ensuring targeted support for the most vulnerable. Improvements to the supply side of the economy would facilitate fiscal consolidation and a smoother decline of inflation toward target levels.

Note: For India, data and forecasts are presented on a fiscal year basis, with FY 2022/2023 (starting in April 2022) shown in the 2022 column. India's growth projections are 6.6 percent in 2023 and 5.8 percent in 2024 based on calendar year.

Forces Shaping the Outlook

The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine is slowing amid widening divergences among economic sectors and regions.

The World Health Organization (WHO) announced in May that it no longer considers COVID-19 to be a "global health emergency." Supply chains have largely recovered, and shipping costs and suppliers' delivery times are back to pre-pandemic levels. But forces that hindered growth in 2022 persist. Inflation remains high and continues to erode household purchasing power. Policy tightening by central banks in response to inflation has raised the cost of borrowing, constraining economic activity. Immediate concerns about the health of the banking sector have subsided, but high interest rates are filtering through the financial system, and banks in advanced economies have significantly tightened lending standards, curtailing the supply of credit. The impact of higher interest rates extends to public finances, especially in poorer countries grappling with elevated debt costs, constraining room for priority investments. As a result, output losses compared with pre-pandemic forecasts remain large, especially for the world's poorest nations.

Despite these headwinds, global economic activity was resilient in the first quarter of 2023, with that resilience driven mainly by the services sector. The post-pandemic rotation of consumption back toward services is approaching completion in advanced economies (including in tourism dependent economies of southern Europe), and it accelerated in a number of emerging market and developing economies in the first quarter (Figure 1). However, as mobility returns to pre-pandemic levels, the scope for further acceleration appears more limited.

At the same time, non-services sectors, including manufacturing, have shown weakness, and high-frequency indicators for the second quarter point to a broader slowdown in activity. Amid softening consumption of goods, heightened uncertainties regarding the future geo-economic landscape, weak productivity growth, and a more challenging financial environment, firms have scaled back investment in productive capacity. Gross fixed capital formation and industrial production have slowed sharply or contracted in major advanced economies, dragging international trade and manufacturing in emerging markets with them. International trade and indicators of demand and production in manufacturing all point to further weakness. Excess savings built up during the pandemic are declining in advanced economies, especially in the United States, implying a slimmer buffer to protect against shocks, including those to the cost of living and those from more restricted credit availability.

The fight against inflation continues. Inflation is easing in most countries but remains high, with divergences across economies and inflation measures. Following the build-up of gas inventories in Europe and weaker-than-expected demand in China, energy and food prices have dropped substantially from their 2022 peaks, although food prices remain elevated. Together with the normalization of supply chains, these developments have contributed to a rapid decline in headline inflation in most countries. Core inflation, however, has on average declined more gradually and remains well above most central banks' targets. Its persistence reflects, depending on the particular economy considered, pass-through of past shocks to headline inflation into core inflation, corporate profits remaining high, and tight labor markets with strong wage growth, especially in the context of weak productivity growth that lifts unit labor costs. However, to date, wage-price spirals—wherein prices and wages accelerate together for a sustained period—do not appear to have taken hold in the average advanced economy, and longer-term inflation expectations remain anchored. In response to the persistence of core inflation, major central banks have communicated that they will need to tighten monetary policy further. The Federal Reserve paused rate hikes at its June meeting but signaled further ones ahead, and the Reserve Bank of Australia, Bank of Canada, Bank of England, and European Central Bank have continued to raise rates. At the same time, in some other economies, particularly in East Asia, where mobility curbs during the pandemic restricted demand for services longer than elsewhere, core inflation has remained low. In China, where inflation is well below target, the central bank recently cut policy interest rates. The Bank of Japan has kept interest rates near zero under the quantitative and qualitative monetary easing with yield curve control policy.

Acute stress in the banking sector has receded, but credit availability is tight. Thanks to the authorities' swift reaction, the March 2023 banking scare remained contained and limited to problematic regional banks in the United States and Credit Suisse in Switzerland. Accordingly, since the April 2023 WEO, global financial conditions have eased (Box 1), a sign that financial markets may have become less concerned about risks to financial stability coming from the banking sector. But tight monetary policy continues to put some banks under pressure, both directly (through higher costs of funding) and indirectly (by increasing credit risk). Bank lending surveys in the United States and Europe suggest that banks restricted access to credit considerably in the first quarter of 2023, and they are expected to continue to do so in coming months. Corporate loans have been declining lately, as has commercial real estate lending.

Following a reopening boost, China's recovery is losing steam. Manufacturing activity and consumption of services in China rebounded at the beginning of the year when Chinese authorities abandoned their strict lockdown policies; net exports contributed strongly to sequential growth in February and March as supply chains normalized and firms swiftly put backlogs of orders into production. Nonetheless, continued weakness in the real estate sector is weighing on investment, foreign demand remains weak, and rising and elevated youth unemployment (at 20.8 percent in May 2023) indicates labor market weakness. High-frequency data through June confirm a softening in momentum into the second quarter of 2023.

Growth Slowing, with Shifting Composition

Global growth is projected to fall from 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024 on an annual average basis (Table 1). Compared with projections in the April 2023 WEO, growth has been upgraded by 0.2 percentage point for 2023, with no change for 2024. The forecast for 2023–24 remains well below the historical (2000–19) annual average of 3.8 percent. It is also below the historical average across broad income groups, in overall GDP as well as per capita GDP terms. Advanced economies continue to drive the decline in growth from 2022 to 2023, with weaker manufacturing, as well as idiosyncratic factors, offsetting stronger services activity. In emerging market and developing economies, the growth outlook is broadly stable for 2023 and 2024, although with notable shifts across regions. On a year-over-year basis, global growth bottomed out in the fourth quarter of 2022. However, in some major economies, it is not expected to bottom out before the second half of 2023.

World trade growth is expected to decline from 5.2 percent in 2022 to 2.0 percent in 2023, before rising to 3.7 percent in 2024, well below the 2000–19 average of 4.9 percent. The decline in 2023 reflects not only the path of global demand, but also shifts in its composition toward domestic services, lagged effects of US dollar appreciation—which slows trade owing to the widespread invoicing of products in US dollars—and rising trade barriers.

These forecasts are based on a number of assumptions, including those regarding fuel and nonfuel commodity prices and interest rates. Oil prices rose by 39 percent in 2022 and are projected to fall by about 21 percent in 2023, reflecting the slowdown in global economic activity. Assumptions regarding global interest rates have been revised upward, reflecting actual and signaled policy tightening by major central banks since April. The Federal Reserve and Bank of England are now expected to raise rates by more than assumed in the April 2023 WEO—to a peak of about 5.6 percent in the case of the Federal Reserve—before reducing them in 2024. The European Central Bank is assumed to raise its policy rate to a peak of 3¾ percent in 2023 and to ease gradually in 2024. Moreover, with near-term inflation expectations falling, real interest rates are likely to stay up even after nominal rates start to fall.

Indian Economy Overview

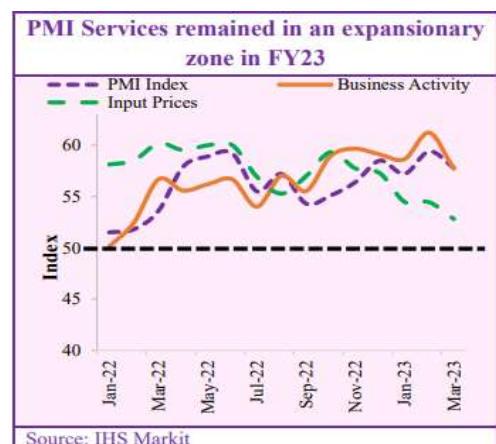

After reaching 7.2% in FY 2022-23, real GDP growth is expected to slow to 6% in FY 2023-24, before rising to 7% in FY 2024-25. While indicators suggest that India’s growth is stable for now, headwinds from the impact of rapid monetary policy tightening in the advanced economies, heightened global uncertainty and the lagged impact of domestic policy tightening will progressively take effect. With slower growth, inflation expectations, housing prices and wages will progressively moderate, helping headline inflation converge towards 4.5%. This will allow interest rates to be lowered from mid-2024. The trade restrictions (including export bans on various rice varieties) imposed in 2022 to fight inflation are assumed to be withdrawn. The current account deficit will narrow, reflecting abating import price pressures.

FY 2022-23 ended on a positive note, due to higher-than-expected agriculture output and strong government spending. However, high inflation, in particular for energy and food, and the ensuing monetary tightening to anchor expectations are weighing on purchasing power and household consumption, particularly in urban areas. Tighter financial market conditions are reflected in weakening credit-supported demand for capital goods, a good proxy for business investment. Although services export growth remains brisk and the sectoral surplus rose by 35%, it is insufficient to offset the imbalance in goods’ trade. Low labour productivity is affecting the competitiveness of “Made in India” goods and participation in global value chains. The current account deficit narrowed in the October-December quarter to 2.2% of GDP, from 2.7% in the same period in FY 2021-22. Headline inflation has fallen below 6% (the central bank’s upper bound of the tolerance band) since March 2023, due to lower food prices, as well as base effects. Employment and wage estimates suggest improving labour market conditions in rural areas, while export-oriented service firms report increasing difficulties filling vacancies.

Domestic growth prospects are strongly influenced by global developments. India has seized the opportunity of discounted Urals oil, which has increased Russia’s share in its energy imports. The sourcing of fertilisers from Russia has also increased considerably, more than doubling in volume in case of urea. Overall, Indian imports from Russia rose from USD 9.9 billion (1.6% of total imports) in FY 2021-22 to USD 46.2 billion (6.5%) in FY 2022-23. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India’s trade partners witness an economic slowdown. India’s current account deficit (CAD) decreased to US\$ 1.3 billion (0.2 per cent of GDP) in Q4:2022-23 from US\$ 16.8 billion (2.0 per cent of GDP) in Q3:2022-23¹, and

US\$ 13.4 billion (1.6 per cent of GDP) a year ago [i.e., Q4:2021-22].

The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030. In the Union Budget of 2022-23, the government announced funding for the production linked incentive (PLI) scheme for domestic solar cells and module manufacturing of Rs. 24,000 crore (US\$ 3.21 billion).

The industry sector the world over was adversely impacted during FY23 owing to supply chain disruptions and high raw material costs. Major economies witnessed PMI Manufacturing entering the contractionary zone post-August 2022. However, in the case of India, PMI Manufacturing remained in an expansionary zone throughout the year, supported by new orders and output expansion. Yet the growth in the manufacturing sector’s GVA witnessed a temporary moderation in Q2 and Q3 of FY23 owing to elevated input costs. However, with the decline in input costs, rising demand and increased capacity utilisation, the manufacturing sector’s GVA revived in Q4 of FY23. The growth in the manufacturing sector’s GVA, which constitutes around three-fourths of the industrial Gross Value Added (GVA), led to a rebound in the industrial sector in Q4 of FY23. This was also supported by growth in Q4 of the other major component of the industries, i.e., the construction sector.

The growth in the services sector also remained strong in FY23, largely driven by the contact-intensive services sectors. This sector completely recovered to the pre-pandemic level in FY23, driven by the removal of mobility restrictions, the release of pent-up demand, and near-universal vaccination coverage. PMI Services remained in the expansionary zone throughout the year, supported by improvement in new business intakes, increased orders placed, and flagged price pressures of inputs and raw materials post-October 2022. Trade, Hotels, Transport, Communication and Services related to Broadcasting and Financial Real Estate & Professional Services are major drivers of the growth in this sector.

The ILO, in its World Employment and Social Outlook 2023, has stated that the recovery of global labour markets is not yet complete. This may be particularly true for the advanced economies. In so far as India is concerned, its labour force, as well as the labour force participation rate (LFPR), has risen through the pandemic, broadly in tandem with the pre-pandemic trend. The presence of a large unorganised sector that sustains on daily wages and income overcame the scarring effects of the pandemic to register a continuous increase in Worker Population Ratio (WPR) as well. Consequently, the annual rural-urban combined unemployment rate (UR) declined from 2017-18 to 2021-22 despite a brief period in 2020-21 when the pandemic-induced lockdowns temporarily increased the urban UR. In 2022-23, the urban UR declined in each quarter, reflecting steady growth in employment levels in the country. A declining urban UR has also subsumed growth in employment in the construction sector, as its strong revival has paved the way for rural migrants to find job opportunities in urban areas.

At a broader level of the manufacturing and services sector as well, rising job creation is evident. Growth in new business is seen to be behind job creation, particularly in the manufacturing sub-sectors of electronics, auto and auto ancillary and chemicals and the services sector of insurance, hospitality and banking. In the services sector, particularly, increased public awareness of health insurance products post-pandemic, rising business and leisure travel, and rapid expansion of digital banking services were the major factors contributing to new job creation. Rising employment levels in the formal sector have also been supported by improved education infrastructure and enhanced quality of education, which has increased the employability of the young labour force. According to India Skills Report 2023, the employable percentage of final-year and pre-final-year students increased from 33.9

per cent in 2014 to 50.3 per cent in 2023.

The economy will not escape the global slowdown

While banks' solvency ratios and financial results have improved and the authorities have enhanced loan-loss provisioning and established a 'bad bank', any deterioration of banks' asset quality could threaten macro-financial stability. In the run-up to the 2024 elections, fiscal consolidation may be delayed, and the conclusion of trade agreements may become more difficult. A potentially below-normal monsoon season could also impact growth. Declining geopolitical uncertainty, on the other hand, would boost confidence and benefit all sectors, as would a faster-than-expected conclusion of free-trade agreements with key partners and the incorporation therein of services.

Growth Outlook for FY24

The Indian economy has carried the momentum from FY23 into the current fiscal year. High-frequency indicators paint a healthy picture of the state of the economy. Urban demand conditions remain resilient, with higher growth in auto sales, fuel consumption and UPI transactions. Rural demand is also on its path to recovery with robust growth in two and three wheelers sales. GST collections and Purchasing Managers' Index for the manufacturing and services sector continue to expand. On the global front, the uptick in economic activity during the first quarter of 2023 has continued in the second quarter as well, as evident in the expansion of the global Composite PMI. However, factors that can constrain the pace of growth include escalation of geopolitical stress, enhanced volatility in global financial systems, sharp price correction in global stock markets, high magnitude of El-Nino impact, and modest trade activity and FDI inflows owing to frail global demand. Should these developments deepen and dampen growth in the subsequent quarters, the external sector may challenge India's growth outlook for FY24.

Despite unprecedented global challenges in the last few years coming on top of balance sheet troubles in Indian banking and non-financial corporate sectors, macroeconomic management has been stellar. It contributed significantly to enhancing India's macroeconomic stability and set India on a quicker recovery path than has been the case in other nations. Investments in supply-side infrastructure raise the possibility that India can enjoy sustained economic growth longer than it has been able to in several decades. Strong balance sheets and digital advancements could lead to better credit decisions allowing India's financial cycle to sustain for longer periods before encountering the challenge of bad debts. Thus, India appears poised to sustain its growth in a more durable way than before. Nonetheless, it is no time to rest on laurels nor risk diluting the painstakingly and consciously achieved economic stability. If we are patient, the rising tide will lift all boats as it has begun to.

Global Steel Industry

World crude steel production, as reported by the World Steel Association, has witnessed remarkable changes from 1950 to 2022. The trajectory of production during this period reflects global economic shifts, technological advancements, and the evolution of various industries.

In the mid-20th century, steel production saw steady growth driven by post-World War II reconstruction and the expansion of industries. The 1950s and 1960s marked a period of relatively stable growth, with the developed world being the primary contributor to the increased demand for steel. With 10 year CAGR 6.264% steady production F.Y. 1950 189 MT to F.Y.1960 347 MT worldwide which indeed reflected in growth of global Infrastructure development in Developed Economies.

From 1960s growth for production of Stainless steel a big boost since after Boom in Global Automotive Industries. Although, In 1970s brought challenges such as oil crises and economic recessions that temporarily impacted steel production. However, the late 1960s and 1980s witnessed resurgence due to urbanization, infrastructure projects, and industrialization in newly industrialized countries. During the period of this two decade Steel industry was got a boost of with 20 year CAGR 3.7% Stable production F.Y. 1960 347 MT to F.Y.1980 717 MT worldwide.

The 1990s saw the emergence of Asia, particularly China & India, as a dominant force in steel production. China's rapid economic growth and urbanization fueled an unprecedented demand for steel, leading to a substantial increase in global production. China's steel production grew rapidly from 1990 to 2000. In 1990, China produced

123 MT of steel. By 2000, it had increased to 375 MT. where India Produced 33 MT of Crude Steel, by 2000 it had increased to 172 MT. China's steel production grew at an average annual rate of 14.8%, while India's steel production grew at an average annual rate of 7.2% p.a. alone.

Entering the 21st century, the steel industry faced environmental concerns and the need for sustainable practices. Efforts were made to improve energy efficiency and reduce carbon emissions in steel production processes. Both the Chinese and Indian governments are aware of the environmental impact of the steel industry and are taking steps to reduce it. They are investing in cleaner technologies and promoting energy efficiency. They are also working to improve air quality in steel-producing areas.

The steel industry is a major part of the economies of both China and India and is likely to continue to grow in the coming years. However, the governments of both countries will need to balance the need for economic growth with the need to protect the environment.

China's steel production grew rapidly from 2000 to 2010. In 2000, China produced 375 MT of steel. By 2010, it had increased to 1,075 MT. This represents an average annual growth rate of 11.7% whereas India's steel production also grew rapidly from 2000 to 2010. In 2000, India produced 172 MT of steel. By 2010, it had increased to 535 MT. This represents an average annual growth rate of 8.6%. The period from 2000 to the 2010s witnessed a remarkable transformation in the global steel industry, with China and India emerging as key players in terms of steel production. These two countries experienced significant growth in their steel sectors, driven by a combination of factors including rapid economic development, urbanization, infrastructure projects, and industrialization.

Throughout these decades, there were periods of decline attributed to global economic downturns and crises, such as the 2008 financial crisis, which had a temporary impact on steel production.

Global Steel Output During this period of F.Y. 2000 to 2010 jumped from 850 MT to 1435 MT (1.435 Billion Tons) with 10 year CAGR of 5.37%. Their surging steel output not only satisfied domestic demand but also led to increased exports by major economies like China and India etc, often at competitive prices. This resulted in shifts in global trade dynamics and triggered concerns in other steel-producing nations that faced challenges in competing with the lower-cost production.

Furthermore, the global steel industry faced environmental challenges due to increased emissions and resource consumption associated with the production process. Both China and India took steps to address these concerns by gradually implementing more stringent environmental regulations and advocating for cleaner production methods.

The period from 2010 to the 2020s witnessed further evolution in China and India's steel industries, as well as significant shifts in the global steel production landscape. Economic developments, technological advancements, and environmental concerns played pivotal roles in shaping these trajectories.

China's Steel Production Evolution: During this period, China continued to dominate the global steel production landscape, although its growth trajectory experienced changes. The rapid growth that characterized the previous decade started to slow down as China's economy transitioned from an investment-driven model to a consumption-driven one. The government also became more conscious of the environmental impacts of unchecked industrial expansion.

To address overcapacity and environmental issues, China implemented policies aimed at curbing excess steel production, shutting down outdated and inefficient steel plants, and encouraging consolidation within the industry. These measures, combined with a focus on higher-quality steel production, resulted in more sustainable growth.

While the growth rate was lower compared to the previous decade, China's crude steel production still increased during this period. From around 627 MMT (million metric tons) in 2010, it reached approximately 996 MMT (million metric tons) metric tons by 2019, an increase of about 59%. This growth reinforced China's position as the world's leading steel producer, despite the more moderate pace.

India's Steel Production Ascension:

India's steel industry continued its upward trajectory, with growth rates outpacing those of many other countries. The Indian government's continued focus on infrastructure development, urbanization, and manufacturing led to sustained steel demand.

Between 2010 and 2019, India's crude steel production more than doubled. Starting from around 66 million metric tons in 2010, it surged to approximately 111 MMT (million metric tons) metric tons in 2019, marking a growth rate of about 68%. This growth was supported by investments in modernizing existing steel plants, establishing new facilities, and leveraging technological advancements.

India's proactive measures to attract foreign investments and improve ease of doing business further contributed to its steel industry's growth. The introduction of the National Steel Policy in 2017 aimed at increasing domestic production capacity and encouraging value addition in the steel sector.

The global steel industry underwent significant changes during this period as well from 1.435 BT (Billion Tones) to 1.882 BT (Billion Tones). The rise of China as a dominant player in the previous decade had led to concerns of overcapacity and unfair trade practices. Other steel-producing countries faced challenges in competing with China's lower-cost production and exporting. Trade tensions escalated as countries sought to protect their own industries. This led to discussions about imposing tariffs and addressing issues related to subsidized steel production and exports from certain countries. The global steel market became more complex, with shifts in supply chains and trade patterns.

Environmental considerations gained prominence, with increased emphasis on sustainable production practices. Steelmakers globally started adopting cleaner technologies to reduce emissions and resource consumption. This push for sustainability also influenced the strategies of China and India.

In 2020, the COVID-19 pandemic caused disruptions across industries, including steel production. Lockdowns, supply chain interruptions, and decreased demand resulted in a decline in global steel output.

Despite these challenges, by 2022, world crude steel production reached unprecedented levels. From 1.882 BT (Billion Tones) in 2019 to 1.962 BT (Billion Tones) and finally down to 1.885 BT (Billion Tones) in 2022. The industry had evolved significantly, with a focus on technology, sustainability, and innovation. Steel remained a fundamental material in industries ranging from construction and transportation to manufacturing and energy.

In summary, World Steel Association data showcases how world crude steel production underwent dynamic changes over the years. It reflects economic shifts, technological progress, and the rise of new economic powers. While facing challenges, the industry continued to adapt and thrive, shaping the modern global economy.

GOI Initiative:

National Steel Policy (NSP) 2017

The National Steel Policy 2017 (NSP 2017) aims to boost the MSME sector, enhance raw material security, promote R&D, cut import reliance, and develop a globally competitive steel industry. This supports self-sufficiency and economic growth. The policy focuses on technology and MSME steel plants for additional capacity and improved productivity.

The Government introduced the NSP 2017 to guide long-term growth in the Indian steel industry by 2030-31. The policy mandates preference for domestically produced iron and steel (DMI&SP) in Government procurement. The policy covers a list of 49 iron and steel products, with higher value addition (20-50%) requirements, making it challenging for imported steel to compete. All Government entities fall under the purview of this policy, covering projects funded by the Government.

The policy applies to projects with iron and steel procurement value exceeding ₹5 Lakh, preventing procurement splitting to bypass its provisions. Exceptions are made for grades not produced domestically or insufficient local supply for project needs.

PM GatiShakti National Master Plan:

With assistance from Bhaskaracharya Institute for Space Applications and Geo-informatics (BiSAG-N), infrastructure Ministries have added their rail, road, port networks to PM GatiShakti National Portal. Ministry of Steel joined using a BiSAG-N mobile app, uploading 2100+ steel unit geo-locations and iron ore/Manganese mines. This Ministry is adding slurry pipelines, labs, and identifying 22 high-impact projects for multimodal connectivity to bridge infrastructure gaps. These efforts align with PM GatiShakti Master Plan, fostering logistic solutions to support steel sector goals outlined in NSP 2017 by 2030-31.

Production Linked Incentive (PLI) Scheme:

The Cabinet approved a ₹6,322 crore PLI Scheme for specialty steel production. Five categories of specialty steel are covered, used in applications like white goods, automobiles, pipelines, turbines, etc. Scheme commenced in FY 2023-24, with 57 MoUs finalized out of 67 applications from 30 companies. This will attract ₹29,530 Crore investment, 25 million ton capacity addition, and 70,000 jobs. The PLI Scheme anticipates reaching 42 million tons of specialty steel production by 2026-27, curbing imports and boosting exports.

The National Steel Policy 2017 outlines growth for the Indian steel industry, fostering technological advancement and global competitiveness by 2030-31. The Government also introduced a policy for preference to domestically manufactured iron and steel products in Government procurement, aligning with the 'Make in India' vision.

Digitization of Mines:

Employing digitization is an important element for optimizing the iron ore mining throughput in the country. Across the world, digital technologies are being leveraged throughout the mining value chain to improve production efficiencies and quality. These technologies improve transparency in the mining industry and can potentially be a game changer in unlocking value for both mining and steel industry. For this, a detailed roadmap has been put in place to kick-start the digitization journey for the iron ore mining sector in the country. The project is being executed in 2 phases with involvement from key Central Public Sector Enterprises. NMDC has already initiated the project for digitizing its Iron Ore mines in Chhattisgarh.

Steel Scrap Recycling Policy:

The Steel Scrap Recycling Policy (SSRP) was established on November 7, 2019, to foster organized processing and recycling of ferrous scrap, including end-of-life vehicles (ELVs). SSRP's framework enables the creation of metal scrapping centers for safe and environmentally sound dismantling, shredding, and recycling of scrap, reducing pollution and health risks. The Ministry of Steel facilitates this policy, encouraging entrepreneurs to establish scrapping centers, producing shredded scrap as raw material for steel production. This curbs import dependency, enhances resource efficiency, energy savings, and reduces GHG emissions. MSTC Limited, in a joint venture with Mahindra Accelo, set up six Vehicle Scrapping Centers in Greater Noida, Chennai, Pune, Indore, Ahmadabad, and Hyderabad, with plans for more centers in the future.

MSME Payments:

The status of pending payments to MSMEs by CPSEs of the Steel Ministry is being monitored on weekly basis to ensure that the same is credited timely and well within the 45 days time limit prescribed for such payments.

98% of the payment during April-December of the current fiscal has been made within 30 days. During April-December 2022, Steel CPSEs have made a payment of ₹. 5434.60 Crore to MSMEs which is 61.81% higher than payment of ₹ 3,358.61 crore made during CPLY.

Operational Global Industry Overview:

In Ocean of Iron & Steel Industry La Tim Metal & Industries Ltd. primarily operates in trading of Color Coated Sheets and Roofing Profile Sheets in India.

Color coated steel refers to a type of steel that is coated with a layer of paint or polymer to enhance its appearance and protect it from corrosion. This process not only adds aesthetic value to the steel but also extends its lifespan, making it suitable for various applications in construction, automotive, appliances, and other industries.

Over the past few years, the color coated steel market has experienced significant growth due to the rising demands from construction and infrastructure sectors. The increasing trend of using color-coated steel in residential and commercial buildings has been a major driving factor for the market. Additionally, the automotive industry's rapid expansion and the growing popularity of pre-painted steel sheets for manufacturing lightweight and fuel-efficient vehicles have contributed to the market's growth. The Global color Coated Steel market size was valued at USD 28.146 billion in 2021-2022 and is expected to expand at a CAGR of 3.51% during the forecast period, reaching USD 34.62 billion by 2030.

Colored coatings are terms used to describe the application of decorative and/or protective organic coatings on steel substrates supplied in the form of coils. Color coated steel is also known as pre-coated steel. Color coatings are coating coatings that are specialty products that provide long-term protection for steel under a wide range of corrosive conditions, from atmospheric exposure to complete immersion in highly corrosive solutions. The color coating provides little strength to the base steel, but it protects the steel to maintain its strength and integrity.

Indian Color Coated Sheets & Roofing Industry Overview:

The Indian color coated steel & roofing market was established indigenously in the late 1980s. The first color coated steel plant in India was set up by Tata Steel in Jamshedpur in 1987. This was followed by the establishment of plants by other steel companies, such as SAIL, JSW Steel, and Essar Steel.

Color coated steel is a versatile material that can be used for a variety of applications, including roofing, siding, fencing, and balustrades. It is also used in the construction of industrial buildings and infrastructure projects. The Indian color coated steel & roofing market is expected to continue to grow in the coming years. This is due to the increasing demand for durable and aesthetically pleasing roofing materials, as well as the growing investment in infrastructure projects.

The color coated steel market in India has grown rapidly since its inception. In 2022, the estimated market was valued at around \$3.5 billion and is expected to grow to \$6 billion by 2026. The growth of the market is being driven by the increasing demand for roofing materials that are durable, corrosion-resistant, and aesthetically

pleasing.

Here are some of the factors that are driving the growth of the Indian color coated steel & roofing market:

Infrastructure Investments: For F.Y. 2023 budget announcement by the Government of India for the Infrastructural Development is truly monumental. A whopping budget of Rs. 10 lakh crore (US\$ 137 billion) has been allocated for infrastructure development in India. This is a remarkable increase of 33% from the previous year's budget. The funds will be utilized to support various infrastructure projects, including roads, Bus-stops, Railways, Airports, Ports, and Power plants. Continued investments in infrastructure projects such as, Metro systems, railway yards and transportation networks drive demand for construction materials, including color-coated steel for roofing and cladding applications.

Rapid Urbanization and Infrastructure Development: According to NITI Aayog India has been experiencing rapid urbanization and significant infrastructure development From 2009 to 2021 This has led to increased demand for construction materials, including color-coated steel and roofing products, for residential, commercial, and industrial buildings. In 2009, the urban population of India was 31.1% of the total population. By 2021, this number had increased to 39.9%. This means that the urban population of India has grown by 8.8% in just 12 years, there are a number of factors that have contributed to this rapid urbanization such as improvement in Per Capita GDP, Industrialization, Rural-Urban Migration, Government initiative like Pradhan Mantri Awas Yojana (PMAY).

Affordable Housing Initiatives: The Indian government's focus on affordable housing initiatives has led to a surge in demand for cost-effective construction materials, including color-coated steel and roofing solutions. The flagship housing program of the Government of India. It aims to provide affordable housing to all homeless and economically weaker sections of society by 2022. The program has three components: PMAY-Urban, PMAY-Rural, and PMAY-Gramin.

Growing Construction Industry: The construction industry in India has been expanding, driven by factors such as real estate development, commercial projects, and industrial expansion. Color-coated steel and roofing products are commonly used in these projects due to their durability, aesthetic appeal, and ease of installation. The Smart Cities Mission is a national urban renewal and retrofitting program by the Government of India with the mission to develop 100 smart cities across the country, making them citizen friendly and sustainable. The Union Ministry of Housing and Urban Affairs are responsible for implementing the mission in collaboration with the state governments of the respective cities.

Advancements in Manufacturing Technology: Technological advancements in the manufacturing of color-coated steel and roofing materials have improved the quality and variety of products available in the market. This has attracted consumers looking for durable and aesthetically pleasing roofing solutions. : For ensuring a safe working environment in the Indian steel sector, the Ministry of Steel has formulated 25 safety guidelines in the form of a book viz. "Safety Guidelines for the Iron and Steel Sector". These guidelines pertain to specific activities/ hazards faced by the Indian steel industry (both large and small).

Focus on Energy Efficiency: Color-coated steel roofing products often come with reflective coatings that help in maintaining lower indoor temperatures, thereby contributing to energy efficiency in buildings. With an increasing emphasis on sustainability, these products have gained popularity. Detailed discussions on de-carbonization and improvement of resource efficiency in Steel Sector were also held in meetings of Consultative Committees of Parliament on "Transition towards Low Carbon Steel-Green Steel on 6th May, 2022" and "Roadmap for Circular Economy in Steel Sector" on 1st July, 2022". Changing Consumer Preferences: As the Indian middle class grows and disposable income increases, there's a greater emphasis on aesthetics and design in construction. Color-coated steel and roofing products offer a wide range of colors and profiles, allowing consumers to choose designs that match their preferences.

Industrial and Commercial Growth: The growth of industries and commercial establishments has led to the demand for sturdy and reliable roofing materials. Color-coated steel offers excellent protection against weather conditions and can be a preferred choice for warehouses, factories, and commercial buildings.

Increased Consumer Awareness: Consumers are becoming more aware of the benefits of using color-coated steel and roofing products, such as their ability to resist corrosion, provide thermal insulation, and offer design versatility. This awareness has contributed to a higher adoption rate.

Globalization and Trade: The Indian market has been exposed to global trends and products. This exposure has led to a preference for modern roofing materials that offer enhanced performance and aesthetics, which color-coated steel can provide.

The Indian color coated steel & roofing market is a competitive market. The major players in the market include Tata Steel, SAIL, JSW Steel, Essar Steel, and Arcelor Mittal. These companies are constantly investing in new technologies and capacity expansions in order to maintain their market share.

Initiative for Standardized & Quality control of Iron & Steel by GoI:

Government has been facilitating supply of quality steel for critical end-use applications such as infrastructure, construction, housing and engineering sector. Ministry of Steel is the leading Ministry with maximum coverage of products under the BIS certifications marks scheme. A total of 145 Indian Standards on Steel and Steel products have been covered under Mandatory Quality Control Orders. These orders prohibit, import, sale and distribution of substandard steel products. The imposition of QCO is in the public interest or for the protection of human, animal or plant health, safety of the environment, or prevention of unfair trade practices, or national security as stated in the BIS Act, 2016. Through the aforementioned orders, Ministry of Steel has so far covered 99 Carbon Steel, 44 Stainless Steel and Alloy Steel products standards and 2 Ferro Alloys under the mandatory BIS Certification Scheme. Further, to meet the requirement of containers manufacturing, Indian Standard 11587 which was already under the purview of quality control order was revised by BIS by including the Corten Steel and the domestic steel manufacturers were urged to apply for BIS certification for the product. Four domestic manufacturers have already been certified by BIS and domestic manufacturers are ready to supply the desired quality of corten steel required by container manufacturers to reduce the dependency of import of corten steel and make container manufacturing industry Aatmanirbhar. In addition, as per the data of imported steel grades shared with BIS, more than 250 new steel grades have been included in the existing standards and 5 new standards are under preparation. This exercise is facilitating the upgradation of the Indian Steel Standards at par with Global Standards. This exercise is also facilitating indigenization of many of the imported steel grades for import substitution and “Make in India” initiative. QCO notified by Ministry of Steel and also the experience gained from the discussions held with the stakeholders have resulted in several benefits which are highlighted below:

- Strengthening of the Indian Standards and also formulation of new standards by BIS based on the information provided by Ministry of Steel.
- Promote indigenisation of the imported steel grades by bringing in the importers and the domestic steel producers together.
- Preventing unfair trade practices such as misdeclaration and under-invoicing of the imported steel consignments. Based on the information shared by Ministry of Steel, the relevant authorities have imposed measures such as ADD, penalties for misdeclaration, etc.

According to the Economic Times Housing Finance Summit, about three houses are built per 1,000 people per year compared with the required construction rate of five houses per 1,000 population. The current shortage of housing in urban areas is estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country's urban population.

Government Initiatives:

Government of India along with the governments of respective States has taken several initiatives to encourage development in the sector. The Smart City Project, with a plan to build 100 smart cities, is a prime opportunity for real estate companies. Below are some of the other major Government initiatives:

- In the Union Budget 2023-24, the Finance Ministry has announced a commitment of Rs. 79,000 crore (US\$ 9.64 billion) for PM Awas Yojana, which represents a 66% increase compared to the last year.
- In October 2021, the RBI announced to keep benchmark interest rate unchanged at 4%, giving a major boost to the real estate sector in the country. The low home loan interest rates regime is expected to drive the housing demand and increase sales by 35-40% in the festive season in 2021.

- Under Union Budget 2021-22, tax deduction up to Rs. 1.5 lakh (US\$ 2069.89) on interest on housing loan, and tax holiday for affordable housing projects have been extended until the end of fiscal 2021-22.
- The Atmanirbhar Bharat 3.0 package announced by Finance Minister Mrs. Nirmala Sitharaman in November 2020 included income tax relief measures for real estate developers and homebuyers for primary purchase/sale of residential units of value (up to Rs. 2 crore (US\$ 271,450.60) from November 12, 2020 to June 30, 2021).
- In order to revive around 1,600 stalled housing projects across top cities in the country, the Union Cabinet has approved the setting up of Rs. 25,000 crore (US\$ 3.58 billion) alternative investment fund (AIF).
- Government has created an Affordable Housing Fund (AHF) in the National Housing Bank (NHB) with an initial corpus of Rs. 10,000 crore (US\$ 1.43 billion) using priority sector lending short fall of banks/financial institutions for micro financing of the HFCs.

Road Ahead:

The Securities and Exchange Board of India (SEBI) has given its approval for the Real Estate Investment Trust (REIT) platform, which will allow all kind of investors to invest in the Indian real estate market. It would create an opportunity worth Rs. 1.25 trillion (US\$ 19.65 billion) in the Indian market in the coming years. Responding to an increasingly well-informed consumer base and bearing in mind the aspect of globalization, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family-owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralized processes to source material and organize manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The residential sector is expected to grow significantly, with the central government aiming to build 20 million affordable houses in urban areas across the country by 2022, under the ambitious Pradhan Mantri Awas Yojana (PMAY) scheme of the Union Ministry of Housing and Urban Affairs. Expected growth in the number of housing units in urban areas will increase the demand for commercial and retail office space.

The current shortage of housing in urban areas is estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country's urban population.

The growing flow of FDI in Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards. Indian real estate is expected to attract a substantial amount of FDI in the next two years with US\$ 8 billion capital infusion by FY22.

In pursuit of diversification and expansion, LaTim is delighted to introduce a premium addition available through trading: Stone Coated Steel Roofing. This remarkable product seamlessly integrates exceptional durability, corrosion resistance, and affordability to meet market demands. In parallel, we're venturing into trading self-drilling screws, signifying our entry into this promising sector. Our strategically positioned Industrial Park, set to launch Phase I in the latter half of FY24, reinforces our dedication to a dynamic and flourishing future. Both stone coated steel roofing and self-drilling screws contribute to our diversified trading portfolio.

In accordance with the NCLT order dated 4th August 2023, La Tim Sourcing (India) Private Limited has successfully merged with La Tim Metal and Industries Limited. This strategic merger aims to boost operational efficiency, capitalize on economies of scale, optimize cash flow, expand the asset base, unlock growth opportunities, and maximize shareholder value. The consolidation will eliminate inter-corporate dependencies, reduce overheads (administrative, managerial, and other costs), rationalize operations, improve organizational efficiency, and optimize resource utilization by eliminating unnecessary duplications and related expenses.

La Tim Sourcing, with its steel manufacturing facility in Umargam, Gujarat specializes in crafting pre-painted galvanized iron steel, pre-painted galvalume steel, and pre-painted cold roll sheets. Prominent industry leaders, along with other valued partners, supply the essential raw materials for our operations. Branches located in Cochin and Chennai strengthen our presence. To overcome logical constraints, raw material imports are occasionally necessary. Notably, we source thicker gauge steel from local suppliers, while the absence of Galvannealed steel production in India compels us to import these materials from countries such as Korea, Vietnam, Japan, and China.

We consciously abstain from hedging, given the higher associated costs and the variable arrival times of imported goods. This open position strategy aligns with our risk management approach. Our manufacturing process is centralized, equipped with a color-coated line boasting a robust monthly capacity of 90,000 tonnes.

In parallel, La Tim Metal and Industries is actively engaged in trading activities, specializing in products like galvalume steel, galvanized steel, cold-rolled coils, aluminum-zinc alloy-coated steel sheets, and galvanized steel. With a focus on both domestic and international sourcing, the company acquires these materials for subsequent sale in the market. The establishment of La Tim Metal And Industries Limited was motivated by the aspiration to establish itself as a premier metals dealer in India. To overcome logistical challenges at our manufacturing facility, La Tim Metals, imports the same products that are then distributed to our branches in Chennai and Cochin. These raw materials are utilized by La Tim Sourcing for its color coating operations.

This merger encapsulates the synergies of both entities, poised to navigate the market landscape more effectively, capitalize on growth avenues, and strategically enhance value for shareholders.

LaTim's Industrial Park, spanning approximately 1554.9 guntha, will operate as a land parceling venture. It aims to sell subdivided plots to companies seeking strategic proximity to the advantageous location mentioned. Situated for easy access from Mumbai and Pune, the park's location gains further prominence with the recent declaration of Khopoli-Pali road as a National Highway leading to Dighi Port. This model leverages the park's prime positioning to facilitate businesses in establishing a presence within a dynamic industrial hub, fostering growth and collaboration.

For the financial year ending on March 31, 2023, the revenue from operations amounted to Rs. 27,161.85 lakhs, as compared to Rs. 56,827.19 lakhs in the previous year. Total expenses for the same period reached Rs. 28,070.40 lakhs, while they were Rs. 54,643.77 lakhs in the prior year. The EBITDA (Earnings Before Interest, Taxes, Depreciation, and Amortization) stood at Rs. 103.36 lakhs in the current year, a significant decrease from Rs. 2,934.94 lakhs in the previous year. The EBITDA margin was 0.38% for the current year and 5.16% for the previous year. A loss of Rs. 749.93 lakhs was incurred for the year ending March 31, 2023, in contrast to a profit of Rs. 1,798.09 lakhs in the previous year. The PAT (Profit After Tax) margin was -2.76% for the current year and 3.16% for the previous year. The net worth for the year ending March 31, 2023, was Rs. 2,770.70 lakhs, compared to Rs. 3,518.36 lakhs in the previous year.

This allows us to deliver products aligned with clients' precise specifications, encompassing thickness, design, and intended usage. Beyond customer orders, we also proactively produce specific items for stock and sale, facilitating quicker deliveries.

Finally, the meticulously manufactured color-coated sheets are carefully packaged and delivered to clients. This comprehensive approach underscores our dedication to quality control, customization, and overall client satisfaction, solidifying La Tim's reputation as a reliable industry provider.

Flow Diagram of Color Coating Line:

Entry Section:

At the entry section of the color coating line, the steel substrate, which serves as the base material for the color-coated sheets, enters the process. This is where the initial stages of surface preparation and cleaning take place to ensure that the substrate is free from impurities and contaminants.

Pre-Treatment:

In the pre-treatment stage, the cleaned steel substrate undergoes further preparation. This can involve processes such as degreasing and chemical treatment. These steps are essential to create an optimal surface for coating adhesion and to ensure that the final product's quality is maintained.

Passivation:

After pre-treatment, a passivation process may be employed. This involves applying a passivating solution that forms a protective layer on the steel surface. This layer helps to prevent corrosion and enhances the substrate's durability.

Prime Coating:

The prime coating step involves applying a layer of primer to the passivated steel surface. The primer coat serves as an intermediary layer between the substrate and the final color coat. It enhances the adhesion of the subsequent layers and provides additional protection against corrosion.

Oven Drying (After Prime Coating):

After the application of the primer coat, the sheets are passed through an oven where they are dried and cured. This step ensures that the primer coat adheres well to the substrate and forms a stable foundation for the subsequent layers.

Finish Coating:

In the finish coating stage, the color coat is applied to the primed steel surface. This coat not only imparts the desired color and appearance to the sheets but also provides resistance against environmental factors such as UV radiation and weathering.

Oven Drying (After Finish Coating):

Similar to the drying process after the prime coating, the sheets are passed through another oven for the finish coating to dry and cure. This step is crucial for achieving consistent paint adhesion, color uniformity, and overall product durability.

Exit Section:

The exit section marks the final stage of the color coating line process. Here, the fully coated and dried sheets are inspected for quality and consistency. The exit section prepares the sheets for further processing or packaging before they are ready for distribution or use in various applications.

Overall, the color coating line process involves a series of carefully orchestrated steps to prepare, prime, and coat steel substrates, ultimately producing high-quality color-coated sheets with enhanced durability and aesthetic appeal.

Our manufacturing process is underpinned by a range of raw materials, including galvalume steel, galvanized steel, cold-rolled coils, aluminum-zinc alloy-coated steel sheets, and galvanized steel. Additionally, we employ a variety of paint system primers, such as epoxy, PU polyester/universal top coat regular modified polyester, to ensure optimal product quality. These materials are carefully sourced from a diverse array of both domestic and international vendors and suppliers.

Our approach to third-party manufacturing is flexible and responsive. We do not engage in long-term contracts but instead source from different vendors based on specific requirements and purchase order basis. Quality assurance is paramount in our operations. Prior to initiating the process of color coating on steel coils, our quality control team meticulously subjects the raw materials to standard quality control tests. This rigorous testing ensures that only materials meeting our strict quality criteria proceed to the production phase, thereby safeguarding the excellence of our end products. We believe we are among the lowest in terms of rejections in the industry.

Our procurement process remains aligned with the outlined approach, where raw materials are procured and stored in accordance with production planning, inventory management, and dispatch schedules. This approach optimizes working capital utilization and ensures a steady supply chain.

Our relationships with suppliers are built on long-standing foundations. We have nurtured enduring partnerships with a multitude of suppliers, both domestically and internationally. This network of relationships mitigates dependence on a single source, contributing to the stability and reliability of our supply chain.

Goods and Service Tax (GST): Goods and Services Tax (GST) is levied on supply of goods or services or both jointly by the Central and State Governments. It was introduced as The Constitution (One Hundred and First Amendment) Act, 2017 and is governed by the GST Council. GST provides for imposition of tax on the supply of goods or services and will be levied by Centre on intra-state supply of goods or services and by the States including Union territories with legislature/ Union Territories without legislature respectively. A destination-based consumption tax GST would be a dual GST with the center and states simultaneously levying tax with a common base. The GST law is enforced by various acts viz. Central Goods and Services Act, 2017 (CGST), State Goods and Services Tax Act, 2017 (SGST), Union Territory Goods and Services Tax Act, 2017 (UTGST), Integrated Goods and Services Tax Act, 2017 (IGST) and Goods and Services Tax (Compensation to States) Act, 2017 and various rules made thereunder. It replaces following indirect taxes and duties at the central and state levels: Central Excise Duty, Duties of Excise (Medicinal and Toilet Preparations), additional duties on excise—goods of special importance, textiles and textile products, commonly known as CVD – special additional duty of customs, service tax, central and state surcharges and cesses relating to supply of goods and services, state VAT, Central Sales Tax, Luxury Tax, Entry Tax (all forms), Entertainment and Amusement Tax (except when levied by local bodies), taxes on advertisements, purchase tax, taxes on lotteries, betting and gambling.

Custom Act, 1962

Customs Act, 1962 and Customs Tariff Act, 1975 are the two appendages of Customs Law in India that must be perused with rules and guidelines. The standard creation power is assigned to the Central Government while the guideline making power designated to the Central Board of Excise and Customs (CBEC). There are various standards and guidelines endorsed every once in a while, to convey the goal of the Act. Custom Duty is an aberrant assessment, forced under the Customs Act defined in 1962. The ability to establish the law is given under the Constitution of India under Article 265, which expresses that —no charge will be imposed or gathered aside from by power of law.

Basis for Opinion

We conducted our audit of the consolidated financial statements in accordance with the Standards on Auditing ("SAs") specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountant of India ("ICAI") together with the ethical requirements that are relevant to our audit of consolidated financial statements under the provision of the Act and the Rules made thereunder, and we have fulfilled our ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our opinion on consolidated financial statements.

Information Other than Financial Statements and Auditor's Report Thereon

The Holding Company's management and the Board of Directors are responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance Report, and Shareholders' Information, but does not include the consolidated financial statements, and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Management and the Board of Directors are responsible for the preparation and presentation of these consolidated financial statements in terms of the requirements of the Companies Act, 2013 that give a true and fair view of the consolidated financial position, consolidated financial performance (including other comprehensive income), consolidated changes in equity and the consolidated cash flows of the Group in accordance with the recognition and measurement principles laid down in Indian Accounting Standards prescribed under Section 133 of the Act read with the relevant Rules issued thereunder and other accounting principles generally accepted in India. The respective Management and Board of Directors of the entities included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of each entity and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial results that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial results by the Management and the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial results, the respective Management and the Board of Directors of the entities included in the Group are responsible for assessing the ability of each entity to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the respective Board of Directors either intends to liquidate the entity or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the entities included in the Group are also responsible for overseeing the financial reporting process of each entity.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial results as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial results.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial results, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Companies Act, 2013 we are also responsible for expressing our opinion through a separate report on the complete set of consolidated financial statements on whether the entity has adequate internal financial controls with reference to consolidated financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the consolidated financial results made by the management and Board of Directors of the Holding Company.
- Conclude on the appropriateness of the management's and Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial results or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial results, including the disclosures, and whether the consolidated financial results represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial results / financial information of the entities within the Group to express an opinion on the consolidated financial results. We are responsible for the direction, supervision and performance of the audit of financial information of such entities included in the consolidated financial results of which we are the independent auditors.

Materiality is the magnitude of misstatements in the consolidated financial results that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the consolidated financial results may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the consolidated financial results.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial results of which we are the independent auditors, regarding among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we are required to determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

ANNEXURE-A TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph (f) under "Report on Other Legal and Regulatory Requirements" section of our report to the Members of **La Tim Metal & Industries Limited** of even date for the year ended March 31, 2023)

Report on the Internal Financial Controls with reference to the consolidated financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to the consolidated financial statements of **La Tim Metal & Industries Limited** ("the Group") as of March 31, 2023 in conjunction with our audit of the consolidated financial statements of the Group for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The respective Company's management and the Board of Directors of the Holding Company and its subsidiary company are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to the consolidated financial statements criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Group's business, including adherence to the respective Group's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls with reference to the consolidated financial statements of the Holding Company and its subsidiary company as aforesaid, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls with reference to the consolidated financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to the consolidated financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to the consolidated financial statements and their operating effectiveness. Our audit of internal financial controls with reference to the consolidated financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system with reference to the consolidated financial statements of the Holding Company and its Subsidiary Company, as aforesaid.

Meaning of Internal Financial Controls with Reference to the Consolidated Financial Statements

A Group's internal financial controls with reference to the consolidated financial statements is a process designed

to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. A Group's internal financial controls with reference to the consolidated financial statements includes those policies and procedures that:

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Group;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Group are being made only in accordance with authorizations of management and directors of the Group; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Group's assets that could have a material effect on the consolidated financial statements.

Inherent Limitations of Internal Financial Controls with Reference to the Consolidated Financial Statements

Because of the inherent limitations of internal financial controls with reference to the consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to the consolidated financial statements to future periods are subject to the risk that the internal financial controls with reference to the consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations give to us, the Group has, in all material respects, an adequate internal financial controls with reference to the consolidated financial statements and such internal financial controls with reference to the consolidated financial statements were operating effectively as at March 31, 2023, based on the criteria for internal control with reference to the consolidated financial statements established by the Group considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

38 - DISCLOSURES AS REQUIRED BY INDIAN ACCOUNTING STANDARD (IND AS) 19 EMPLOYEE BENEFITS

For the holding company, Short-term employee benefits are recognized as expenses at the undiscounted amount in the statement of profit and loss for the year in which the employee has rendered services. The expenses are recognized at the present value. The holding company did not have any eligible employees for the payment of Gratuity. The employees are required to exhaust their leave entitlement during the Financial year itself due to which there was no accumulated earned leave to the credit of any employee. Hence the provision has been made for the Retirement Benefits as required by Ind AS 19 and actuarial valuation report is not obtained accordingly.

- For subsidiary company :

a) Defined contribution plans

- Provident fund

The Company has recognized the following amounts in the statement of profit and loss:

Employers' contribution to provident fund :- Current Year Rs. 8.99 Lakhs (Previous Year Rs. 7.31 Lakhs)

b) Leave Obligations

The leave obligations cover the Company's liability for sick and earned leave. The company has made payment of Rs. 0.6 lakhs (31st March 2022 – Rs. 3.95 lakhs), since the Company does not have an unconditional right to defer settlement for any of these obligations.

c) Defined benefit plans

- Gratuity

In accordance with Indian Accounting Standard 19, actuarial valuation was done in respect of the aforesaid defined benefit plans based on the following assumptions-

Economic Assumptions

The discount rate and salary increases assumed are the key financial assumptions and should be considered together; it is the difference or 'gap' between these rates which is more important than the individual rates in isolation.

Discount Rate

The discounting rate is based on the gross redemption yield on medium to long term risk free investments. The estimated term of the benefits/obligations works out to zero years. For the current valuation a discount rate of 7.51% p.a. (Previous Year 7.38% p.a.) compound has been used.

Salary Escalation Rate

The salary escalation rate usually consists of at least three components, viz. regular increments, price inflation and promotional increases. In addition to this any commitments by the management regarding future salary increases and the Company's philosophy towards employee remuneration are also to be taken into account. Again a long-term view as to trend in salary increase rates has to be taken rather than be guided by the escalation rates experienced in the immediate past, if they have been influenced by unusual factors.

Short-term employee benefits are recognized as expenses at the undiscounted amount in the statement of profit and loss for the year in which the employee has rendered services. The expenses are recognized at the present value. Provision for Gratuity has been made on a discounted basis as per the Actuarial Valuation Report. The employees are required to exhaust their leave entitlement during the Financial year itself due to which there was no accumulated earned leave to the credit of any employee.

The assumptions used are summarized in the following table:

41. FINANCIAL INSTRUMENTS - ACCOUNTING CLASSIFICATIONS AND FAIR VALUE MEASUREMENTS

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

1. Fair values of cash and short term deposits, trade and other short term receivables, trade payables, other current liabilities, short term loans from banks and other financial institutions approximate their carrying amounts largely due to short-term maturities of these instruments.
2. Financial instruments with fixed and variable interest rates are evaluated by the Group based on parameters such as interest rates and individual credit worthiness of the counterparty. Based on the evaluation, allowances are taken to account for the expected losses of these receivables.

The group uses the following hierarchy for determining and disclosing the fair values of financial instruments by valuation technique:

Level 1 : Quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2 : Other techniques for which all inputs which have a significant effects on the recorded fair value are observable, either directly or

Level 3 : Techniques which use inputs that have a significant effects on the recorded fair value that are not based on observable market data.

Set out below, is a comparison by class of the carrying amounts and fair value of the Group's Financial Instruments.

42. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The group's financial risk management is an integral part of how to plan and execute its business strategies.

Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments and deposits, foreign currency receivables, payables and loan borrowings.

The majority of the group's sales come from the steel manufacturing and trading business, and fluctuations in the demand for or supply of steel could have an impact on earnings. In addition, at a time of fierce competition, any changes in the group's competitiveness in terms of technology, cost, quality, or other aspects could have an impact on earnings.

Interest rate risk

Interest rate risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. In order to optimize the group's position with regards to the interest income and interest expenses and to manage the interest rate risk, treasury performs a comprehensive corporate interest rate risk management by balancing the proportion of fixed rate and floating rate financial instruments in its total portfolio.

Interest Rate Sensitivity

Interest expense	2022-23		2021-22	
	1% Increase	1% Decrease	1% Increase	1% Decrease
Amount (in Lakhs)	5.98	(5.98)	3.98	(3.98)
Total	5.85	(5.85)	3.60	(3.60)

Refer Note to accounts for interest rate profile of the Company's interest-bearing financial instrument at the reporting date.

Foreign currency risk

The group imports steel from international market, consequently, the group is exposed to foreign exchange risk in foreign currencies. The group has laid down procedures to de-risk itself against currency volatility and out sources expert advice whenever required.

The group evaluates exchange rate exposure arising from foreign currency transactions and the group follows established risk management policies.

I. Foreign Currency Exposure

Refer Note related to foreign exchange exposure as at 31st March, 2023 and 31st March, 2022 respectively.

II. Foreign Currency Sensitivity

1% increase or decrease in foreign exchange rates will have the following impact on the profit before tax - loss / (profit)

Currency	2022-23		2021-22	
	1% Increase	1% Decrease	1% Increase	1% Decrease
USD	13.87	(13.87)	30.26	(30.26)
Total	13.87	(13.87)	30.26	(30.26)

Credit risk

Credit risk arises from the possibility that counter party may not be able to settle their obligations as agreed. To manage this, the group periodically assesses the financial reliability of customers, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of accounts receivable. Individual risk limits are set accordingly.

The group considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is significant increase in credit risk the group compares the risk of a default occurring on the asset at the reporting date with the risk of default as the date of initial recognition. It considers reasonable and supportive forwarding-looking information such as:

- (i) Actual or expected significant adverse changes in business,
- (ii) Actual or expected significant changes in the operating results of the counterparty.
- (iii) Financial or economic conditions that are expected to cause a significant change to the counterparty's ability to meet its obligation,
- (iv) Significant increase in credit risk on other financial instruments of the same counterparty.
- (v) Significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements.

Financial assets are written off when there is no reasonable expectation of recovery, such as a debtor failing to engage in a repayment plan with the group. The group categorises a loan or receivable for write off when a debtor fails to make contractual payments greater than reasonable period of time decided by the Management. Where loans or receivables have been written off, the group continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognised in profit or loss.

42. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (Contd.)

Liquidity Risk

Liquidity Risk is defined as the risk that the group will not be able to settle or meet its obligations on time or at reasonable price. The group is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the group's net liquidity position through rolling forecast on the basis of expected cash flows.

Comparison of Financial Year Ended March 31, 2023 with Financial Year Ended March 31, 2022:

A) Total Revenue

Our total revenue for the Fiscal 2023 was ₹27,332.37 Lakhs as compared to ₹56,975.57 Lakhs for the Fiscal 2022, representing a decrease of 52.20%.

Total revenue comprises of:

i) Revenue from Operations

In Fiscal 2023, our operations generated revenue of ₹27,161.85 Lakhs, down from ₹56,827.19 Lakhs in Fiscal 2022. This decline can be attributed to a significant drop in steel prices, decreasing by around 40% to ₹57,000 per tonne in the domestic market. The iron and steel demand has fallen sharply across the globe owing to several factors such as global economic slowdown, high energy prices, ongoing Ukraine-Russia crisis, and a sharp downturn in China. This dip in prices resulted from subdued export orders due to a 15% export levy, affecting the export market adversely. While vertically integrated large companies absorbed the impact due to their buffer, the export slowdown led them to release surplus raw material in the domestic market, causing further price reduction.

ii) Other income

Other income for the Fiscal 2023 was ₹170.52 Lakhs as compared to ₹148.38 Lakhs for the Fiscal 2022, representing an increase of 14.92%. The increase in other income is based on judgment of Honorable High Court, wherein all assesseees were required to lodge their claim related to Social Welfare Cess as per Customs Duty Regulations; hence, company has booked income of the said refund claim lodged in relation to Social Welfare Cess.

B) Expenses

Our total expenditure for the Fiscal 2023 was ₹28,070.40 Lakhs as compared to ₹54,643.78 Lakhs for the Fiscal 2022, representing a decrease of 48.63%.

Total expenditure comprises of:

i) Cost of Material Consumed

The Cost of Material Consumed for the Fiscal 2023 was ₹ 12,704.90 Lakhs as compared to ₹ 47,056.84 Lakhs for

the Fiscal 2022, representing a decrease of 73.00%. The substantial decline in steel prices, driven by global factors including economic slowdown, energy price volatility, geopolitical tensions, and China's market dynamics, directly influences the cost of goods sold for our company. With steel prices falling by about 40% to ₹57,000 per tonne in the domestic market, the cost of procuring raw materials for our production process also reduces. Consequently, this results in a corresponding decrease in the cost of goods sold, which has implications for our financial calculations and bottom-line considerations.

ii) Purchase of stock-in-trade

The Purchase of stock-in-trade for the Fiscal 2023 were ₹9,614.75 Lakhs as compared to ₹10,230.30 Lakhs for the Fiscal 2022, primarily due increase in closing stock of raw materials and finished goods.

iii) Changes in Inventories of finished goods, stock-in-trade and work-in-progress

The amount of changes in inventories of finished goods, stock-in-trade and work-in-progress for the Fiscal 2023 were ₹3,651.04 Lakhs as compared to (₹5,087.87) Lakhs for the Fiscal 2022, primarily due to increase in closing stock of finished goods and work in progress.

iv) Employee benefit expenses

Employee benefit expense for the Fiscal 2023 was ₹401.56 Lakhs as compared to ₹385.17 Lakhs for the Fiscal 2022, representing an increase of 4.26%. This increase was due to increase in salary, wages, bonus and staff welfare expense.

v) Finance cost

Finance cost for the Fiscal 2023 was ₹597.90 Lakhs as compared to ₹398.23 Lakhs for the Fiscal 2022, representing an increase of 50.14%. The increase in finance cost is due to restructuring of the existing loan and further increase in term loans.

vi) Depreciation and Amortization Expenses

Depreciation and amortization expense for the Fiscal 2023 was ₹243.50 Lakhs as compared to ₹204.90 Lakhs for the Fiscal 2022, representing an increase of 18.83%. The increase is due to addition in Vehicles during the year which further resulted in increase in depreciation charge.

vii) Other expenses

Other expenses for the Fiscal 2023 were ₹856.75 Lakhs as compared to ₹1,456.20 Lakhs for the Fiscal 2022, representing a decrease of 41.17%. The decrease was mainly due to decrease in operations in terms of both revenue and expenses.

C) Profit/(loss) before exceptional and extra-ordinary item

Profit/(loss) before exceptional and extra-ordinary item for Fiscal 2023 was ₹(738.03) Lakhs as compared to ₹2,331.79 Lakhs for Fiscal 2022. This decrease in profits was primarily due to decrease in revenue from operations.

D) Profit/(loss) before Tax

The profit/(loss) before tax for Fiscal 2023 was ₹(749.93) Lakhs as compared to ₹1,798.36 Lakhs for Fiscal 2022.

E) Tax expenses

Total tax expense for the Fiscal 2023 was ₹11.89 Lakhs as compared to ₹533.43 Lakhs for Fiscal 2022. This is because we have incurred losses during Fiscal 2023 due to decrease in operations.

F) Profit/(loss) after tax

For the reasons discussed above, the profit/(loss) after tax for the Fiscal 2023 was ₹(749.93) Lakhs as compared to ₹ 1798.37 Lakhs for the Fiscal 2022.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the “Department of Industrial Policy and Promotion”) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“**FDI Circular 2020**”), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectorial limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid in order to make any investment in the Issue. Our Company will not be responsible for any allotments made by relying on such approvals.

Please also note that pursuant to Circular no. 14 dated September 16, 2003 issued by RBI, Overseas Corporate Bodies (“**OCBs**”) have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as a incorporated non-resident must do so in accordance with the FDI Circular 2020 and Foreign Exchange Management (Non-Debt Instrument) Rules, 2019. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary

approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the applicable laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.

The above information is given for the benefit of the Applicants / Investors.
